

Panel Technician Full Route

Who is the Panel route for?

The IMI Accreditation Panel route is intended for technicians whose job role involves the repair of vehicles typically involved in accidents or similar incident circumstances.

There are two levels of job roles within Panel; these are:

- **The Technician** should be working in the accident repair sector of the industry and have at least two years experience to ensure they are familiar with the skills, knowledge and techniques required to repair & replace body components, such as vehicle body panels and their associated parts.
- **The Senior Technician** should be working in the accident repair sector of the industry and have at least three years experience to ensure they are familiar with the skills, knowledge and techniques required to repair & replace body components, including returning vehicle alignment to manufacturer specification and rectifying bodyshell faults. Full route assessments will be conducted over 3 days. A total of 7 modules will require completion to a required standard.

See panel route overview.
